Mr Corless

Please see attached sheets from Spurn Head.
We have interpolated values for the old gauge for some days in April and Oct.
I propose to ignore the values published in the MWR for 1926 (they are a beautiful mixture of old and new gauges) and to publish in BR 1926 data for both gauges.
as shewn on attached sheets
Do you concur please?

Should not MO2 be asked to inform observer that values from the new gauge only should appear for 1927 on his Form ~~[illegible]~~, 3207

B G Brown
11/3/27

Mr Spence
What rain records do we receive from Spurn now on Form 3207?

11/3

Met. Corless

The explanation of the use of the old gauge values in certain months of 1926 is as follows :-

January - records from one gauge only were given in monthly return

March records from one gauge only were given in return.

April records from one gauge only were given in return.

June records from new gauge were used in error.

October records from new gauge were used after due consideration because there

were no
records from the old gauge
~~[illegible]~~ on ten days of
the month owing to
silting of sand.

November Old gauge used
with the exception of
2 days on which
record from old gauge
was valueless owing
to silting of sand.

The return for January 1927
is at present with M.O.2.
The February return contains
~~and February has not~~
the records of from both gauges.
~~been received yet~~.

From Jan 1927 records
from new gauge (with new
manuals) are being used.

L. T. Spence

* 5th. Nov:

The reader of the gauge on the morning of the 6th. has written 1·3 in his book. He may have meant 1·30, but the 3 gauges at Mount St. John, Felixkirk, gave 1·12, 1·10 and 1·12, and it seems likely therefore that he meant 1·03 or 1·13. 1·03 has been adopted.

Other gauges in the neighbourhood gave about 1·12.

A.G. Walker.

REPLY.

The Correct rainfall for September 1924 is 3·45

Sept 26 rainfall is as on my Chart ·02 and not ·62 as you have reported to me

Sorry for the mistake in the figure 0 in being made look like a 6

Yours Sincerely

H H Milman

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Calf Lee, Warland Reservoir + Warland Drain for 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
The rainfall recorded at these three stations is in accord except at the end of December. In this month we should suggest the following modifications:— Warland Drain December 31st adopt ·25 in not 1·25 in. Warland Reservoir Dec. 26th adopt ·32 in not 1·32 in. In this case the entry presumably covers the 3 or 4 preceding days. The trouble has possibly arisen owing to snow, and the modifications suggested above will bring the three records into line with others from the district as well as with each other. I should be glad if you indicate whether these changes meet with your approval. J Glasspoole 10.7.26.	The modifications suggested have been made in our records & are approved. J W Haddock Engineer.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.
